

Abstracts of Workshop on Frontiers in Electronics (WOFE 09)

<http://www.rinconoftheseas.com/>

INTRODUCTION

The Workshop on Frontiers in Electronics – WOFE-09 is the sixth in the series of the WOFE workshops. The submitted papers address issues ranging from CMOS and SOI to wide band gap semiconductor technology, terahertz technology, and bioelectronics. The WOFE-09 program provides a unique opportunity for interdisciplinary discussions of key issues of microelectronics, photonics, and nanoelectronics. I also hope that the informal part of the Workshop will stimulate frank, bold and original discussions leading to the presentations of provocative and controversial views. On behalf of the WOFE Organizing, Program, and Steering Committees, I would like to thank all WOFE-09 contributors.

Michael Shur  
WOFE-09 Chair
